NOV 06 2006

MEMORANDUM FOR DOE-LM FEDERAL STAFF

FROM: RAYMOND M. PLIENESS, DEPUTY DIRECTOR
OFFICE OF SITE OPERATIONS, LM-20

SUBJECT: LM Site Management Guide ("The Blue Book") – Revision 2

Attached is Revision 2 to the LM Site Management Guide (Blue Book) for your use. Some of the changes to the Blue Book were a result of review comments provided by various LM and Stoller staff. Although not all comments were incorporated, I do want to thank everyone who provided comments and encourage you to continue to do so. A summary of the changes to the Blue Book are as follows:

- Appendices were updated to reflect actual data as of the end of FY 2006, revised transfer dates, revisions associated with data changes, and general enhancements.
- Category and/or Regulatory Driver changes for a few sites have been made due to incorrect classification.
- Narrative enhancements/corrections were made to sections 2.0 and 3.0.

There is a lot of valid interest associated with including site information data (acreage, wells, ICs, disposal cells) in the Blue Book. That data was not included in this revision; however, LM is working on clarifying that data to ensure that it is ready for inclusion with the next Blue Book revision, planned for April 2007. Additionally, some good comments were provided that we opted to not include due to our objective to ensure the Blue Book provides basic data that is useful for most of the LM federal and contractor staff, yet isn't cumbersome to maintain.

Should you have any comments or changes to the data in the Blue Book, please provide them to Chris Pennal, LM Site Management Guide Coordinator. All comments and changes are reviewed and considered, then managed via a change control process if approved.

The LM Site Management Guide is available via the LM Intranet under the Library tab. Please contact Chris Pennal at 970-248-6011 if you have any questions.

1.0 Introduction

The U.S. Department of Energy (Department) Office of Legacy Management (LM), established in 2003, manages the Department's post-closure responsibilities and ensures the future protection of human health and the environment.

During World War II and the Cold War, the Federal government developed and operated a vast network of industrial facilities for the research, production, and testing of nuclear weapons, as well as other scientific and engineering research. These processes left a legacy of radioactive and chemical waste, environmental contamination, and hazardous facilities and materials at well over 100 sites. Since 1989, the Department has taken an aggressive accelerated cleanup approach to reduce risks and cut costs.

At most Departmental sites undergoing cleanup, some residual hazards will remain at the time cleanup is completed due to financial and technical impracticality. The Department has an obligation to protect human health and the environment after the cleanup completion. In order to meet this post-closure obligation, the management responsibility for Departmental sites, which have no continuing mission at these sites and have been cleaned up, will be transitioned to LM.

In addition to Departmental sites, LM is responsible for sites under the Formerly Utilized Sites Remedial Action Program (FUSRAP). Currently, the U.S. Army Corps of Engineers is responsible for site surveys and remediation at FUSRAP sites. Once remediation is completed LM then becomes responsible for long-term surveillance and maintenance.

LM also assumes responsibility of uranium processing sites addressed by Title II of the Uranium Mill Tailings Radiation Control Act (UMTRCA). UMTRCA Title II sites are sites that were commercially owned and are regulated under U.S. Nuclear Regulatory Commission (NRC) license. For license termination, the owner must conduct an NRC-approved reclamation of any on-site radioactive waste remaining from former uranium ore-processing operations. The site owner also must ensure full funding for inspections and, if necessary, ongoing maintenance. Once site reclamations are complete LM then accepts title to these sites for custody and long-term surveillance and maintenance.

2.0 Purpose

The main purpose of the LM Site Management Guide is to be a control and reference document for LM and its' contractor(s), which provides accurate and consistent information across the LM organization. The core data of this Guide will be updated quarterly and will be presented in the form of tables and charts. The primary data elements of the LM Site Management Guide includes the following:

- 1) Site Name and Location (State)
- 2) Pre-LM Name
- 3) Transferring Organization
- 4) Actual Transfer Date (Fiscal Year)
- 5) Planned Transfer Date (Fiscal Year)
- 6) Regulatory Driver
- 7) Site Type (Category 1, 2, or 3)
- 8) Appropriation Account

The data elements listed above are under configuration control (see Section 8.0) and cannot be altered without proper approvals. LM will manage and control all LM Site Management Guide changes except changes to data regarding the EM Closure Sites transferring to LM, which requires joint approval by EM-1 and LM-1.

The LM Site Management Guide Coordinator will conduct quarterly updates, as necessary, of the LM Site Management Guide.

3.0 Site Types

Each LM site is designated one of three types based on the actual or anticipated LTS&M activities associated with that site. The site type indicates the level of LTS&M activities that are expected for each site, based on the following categories:

- Category I sites are expected to require records-related activities and stakeholder support.
- Category II sites are expected to require routine inspection and maintenance, records-related activities, and stakeholder support.
- Category III sites are expected to require operation and maintenance of remedial action systems, routine inspection and maintenance, records-related activities, and stakeholder support.

4.0 Site Counts

The LM Site Management Guide is the control document for all site count information. The manner in which sites are counted is critical to ensuring LM provides accurate and consistent site count data. It has been determined that each geographic site location will be counted as one site. This also includes geographic site locations having both a former processing site and an associated disposal site. These types of sites will also be counted as one site.

Note: Currently the only exceptions to the site count guidance would be the two FUSRAP sites in St. Louis, MO (St. Louis Airport & St. Louis Airport Vicinity Properties), and the two FUSRAP sites in Niagara Falls, NY (Niagara Falls Storage Site & Niagara Falls Storage Site Vicinity Properties). These 4 FUSRAP sites are

currently counted as 4 sites due to the fact the U.S. Army Corps of Engineers managed these sites as four separate sites.

The following represents examples of some UMTRCA sites having both a former processing site and an associated disposal site:

- **2 Durango, CO, sites counted as 1 site**

- 1) Durango, CO, Disposal Site
- 2) Durango, CO, Processing Site

- **3 Rifle, CO, sites counted as 1 site**

- 1) Rifle New, CO, Processing Site
- 2) Rifle Old, CO, Processing Site
- 3) Rifle, CO, Disposal Site

5.0 Site Nomenclature

The names of many sites that come into the LM program are confusing and non-descriptive. In many cases sites have names using the company name of the former operator of the site, or use a geographic name or nickname. LM has established a systematic approach for naming or identifying sites within LM, in order to eliminate confusion when trying to identify sites and site locations. LM is currently in the process of implementing that systematic approach, which is as follows:

- 1) Eliminate using company names of current or former operators or property owners.
- 2) When possible, a site name should begin by using the name of the nearest city or town. If multiple sites exist near the same city or town, use a direction name (North, South, East, West) following the city or town name. For example, when two former processing sites are near the same city or town, use a direction name after each site to identify where the site is located in relation to that city or town.

Note: LM is currently planning to receive a few sites that do not have a city or town near the site to use as the site name. In these cases, the sites will retain the current pre-LM name. **Example:** There are no cities or towns near the Salmon, MS site. “Salmon” is the project name of the site and is not referencing a geographic location; therefore, the Salmon, MS site will retain the pre-LM site name.

- 3) The name should also include the state where the site is geographically located.
- 4) When applicable the site name should include additional information about the site e.g., processing, disposal, decommissioned reactor. See example below:

Slick Rock East, CO, Processing Site
Slick Rock West, CO, Processing Site

LM-50 is in the process of renaming sites that have already transferred to LM, including renaming the 25 DOE FUSRAP sites that transferred in FY 2004. When necessary, LM will rename sites that have officially transferred to LM and will reference the new names for both internal and external reporting.

Note: LM has revised several site names for sites that have not yet transferred to LM (mainly associated with UMTRCA Title II sites) for internal management purposes. Until a planned site officially transfers to LM, the original site name will be referenced in all outside reporting and data sharing. Appendixes A and B contain both of the sites' pre-LM and LM names for ease in cross-referencing.

6.0 Site Transition Policy

This section references the following site transition policy documents, which can be acquired from the respective DOE LM site manager and/or found on the LM Intranet.

- **Terms and Conditions between EM and LM** – Outlines proposed terms and conditions for managing and funding site transition activities between EM and LM.
- **Site Transition Fact Sheets** – These two pagers outline LM's policy on various aspects of site transition.
- **Site Transition Plans** – This is used to identify and guide the execution of the actions needed to move the site to the point where responsibility can be transitioned from EM to LM.
- **Site-Specific Transition Fact Sheets** – This presents a compilation of fact sheets regarding the status of transition at specific sites. For each site, the following topics are discussed: key milestones; site condition at the time of transfer; transition issues; and information regarding the management and mitigation of programmatic risk.

Note: All planned site transfer dates should be by month and year. In the past, site count estimates by fiscal year for budget formulation purposes have been misstated due to calendar year dates being mistaken for fiscal year.

7.0 Interrelationship of Site Count Data

All LM and contractor staff should recognize the importance of utilizing and adhering to the LM Site Management Guide, due to the interrelationship of site count data within LM and other LM products, processes and systems.

Looking at the LM Program and the core business functions of planning, budget formulation, budget execution and evaluation, site count data is clearly found as being a major part of many products. The following are just a few of the products that require current and accurate site count data:

- LM Strategic Plan
- LM Program Plan
- Budget Formulation
- Life-Cycle Planning
- Environmental Liability Estimates
- Joule System Performance Measures

LM staff should use the LM Site Management Guide as the source document when preparing or releasing site count information for Departmental data calls, or to other transferring organizations. Any questions associated with the data in this guide should be addressed to the LM Site Management Guide Coordinator.

8.0 Configuration Control Process

Configuration control of the LM Site Management Guide will be managed by using the configuration control procedures and forms (currently under development)¹.

9.0 Appendices

The LM Site Management Guide data will be reported in the following appendices:

Appendix A. Current LM Site Count Listing – This appendix is a listing of sites in the LM Program at the end of the previous fiscal year and managed by the LM-50 Office of Land and Site Management.

Appendix B. Site Transition Schedule – This appendix represents a schedule of sites planning to transfer to LM during FY2006 – FY2035.

Appendix C. Planned Site Count by Year – This appendix is a planned site count listing of sites already in the LM Program and sites planning to transfer to LM. The listing will present a site count by year through FY2015.

Appendix D. Current Site Count by State – This appendix is a chart of sites by state currently in the LM program.

Appendix E. Map of sites currently in the LM program.

¹ Until the change control process is formally distributed, all changes to the LM Site Management Guide must be processed through the LM Site Management Guide Coordinator.

Appendix F. Current Site Count by Regulatory Type and Category – This appendix is a chart displaying site counts by Regulatory Type and Category.

Appendix G. Acronyms – This appendix is a list of acronyms used in the LM Site Management Guide.

Appendix A: Current LM Site Count Listing

LM Site Count Listing Through FY 2006

	Site Name	Pre - LM Name	Approp (1)	Category (2)	Regulatory Driver	Fiscal Year Transfer Date
1	Acid/Pueblo Canyon, NM, Site	Acid/Pueblo Canyon	ESC	1	FUSRAP	2004

Appendix D: Current Site Count by State

11/3/2006

State Site Counts as of 9/30/2006

	State	CAT 1	CAT 2	CAT 3	# of Sites
1	Alaska	1			1
2	Arizona			2	2
3	California	3	1		4
4	Colorado		8		8
5	Connecticut	1			1
6	Florida			1	1
7	Idaho		1		1
8	Illinois	4	1		5
9	Kentucky	1			1
10	Massachusetts	2			2
11	Michigan	1			1
12	Missouri	1		1	2
13	Nebraska		1		1
14	New Jersey	3			3
15	New Mexico	3	3	1	7
16	New York	3			3
17	Ohio	5	1		6
18	Oregon	1	1		2
19	Pennsylvania	2	2		4
20	Puerto Rico	2	1		3
21	South Dakota		1		1
22	Tennessee	1			1
23	Texas		1		1
24	Utah		3	1	4
25	Washington		1		1
26	West Virginia		1		1
27	Wyoming		3		3
	TOTAL	34	30	6	70

Category 1: Requires records-related activities and stakeholder support.

Category 2: Requires require routine inspection and maintenance, records-related activities, and stakeholder support.

Category 3: Requires operation and maintenance of remedial action systems, routine inspection and maintenance, records-related activities, and stakeholder support.

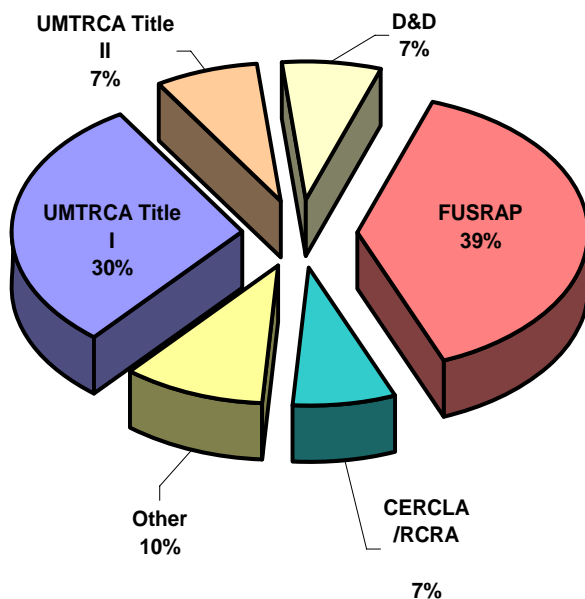

Appendix E: LM Site Map

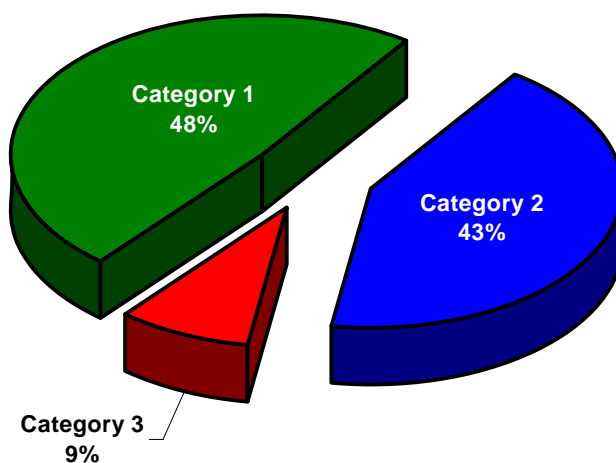

Note: Map is only a representation and may not be to actual scale.

Appendix F: Site Count by Regulatory Type and Category

Type	Actual 2006
UMTRCA Title I	21
UMTRCA Title II	5
D&D	5
FUSRAP	27
CERCLA/RCRA	5
Other	7
TOTAL	70

FY06 Sites by Category	
Category 1	34
Category 2	30
Category 3	6
TOTAL	70

Category 1: Requires records-related activities and stakeholder support.

Category 2: Requires require routine inspection and maintenance, records-related activities, and stakeholder support.

Category 3: Requires operation and maintenance of remedial action systems, routine inspection and maintenance, records-related activities, and stakeholder support.

Appendix G: Acronyms

Comprehensive Environmental Response, Compensation, and Liability Act	CERCLA
Decontamination and Decommissioning	D&D
Department of Energy	Department or DOE
Fiscal Year	FY
Formerly Utilized Sites Remedial Action Program	FUSRAP
Life-Cycle Baseline Management	LCBM
Long-Term Surveillance and Maintenance	LTS&M
Nuclear Regulatory Commission	NRC
Nuclear Waste Policy Act	NWPA
Office of Environmental Management	EM
Office of Legacy Management	LM
Resource Conservation and Recovery Act	RCRA
Uranium Mill Tailings Radiation Control Act	UMTRCA
